SPECIFICATION OF VICTIM LOCATION SYSTEM WITH BREACHING SYSTEM

Qty
06
Nos

1. Victim location systems to be acquired are designed for location and rescue of victims trapped under debris during natural calamities or in mine collapses or confined space disasters. They enable insertion below the debris of a telescopic probe which mounts, at its head, a sensitive articulable video camera, supported by appropriate illumination, whose images can be viewed by the operator and other rescue personnel on remote display monitors. The system also integrates a two - way audio system which can pick up life sounds from the victim and also permits the passage of spoken instructions or assurances to him from the rescue team. Since a rigid telescopic probe has limitations on how far it can be inserted, the camera, light and sound system can also be mounted on one end of a cable which can be used to reach greater depths.

2. The required Breaching System is a heavy duty drill used for making an entry hole for the probe of the victim location system through debris at the disaster site, or other overlying material required to be breached to enable the search camera to access underlying void spaces. It should allow rescue teams to breach most common construction materials with only one system. Its coring bits, carbide tipped diamond studded should be able to bore through wood, nails, sheet metal and roofing materials and reinforced concrete. The system should have a collar for attachment of coring bits as well as for cooling water to be delivered to the spinning carbide tipped diamond studded bits when used.

Capabilities Required (Victim Location System)

- The system's primary configuration will be based on a video camera mounted at one end of a rigid telescopic probe which can reach out into depths and void spaces upto a distance greater than 9ft.
- The colour video camera should be minimum, 1/3" double scan colour CCD with 4,70,000 pixel or more with low light sensitivity to better than 0.1 Lux. The camera head should have travel articulation of 180° total, right to left, with a viewing area not less than 120°. Illumination to be provided by a 16 element LED/xenon lamp integrated into the camera head which can illuminate up to 6m or more in total darkness.

- The system will be provided with two display monitors, one at the operator level and the second for remote viewing by other rescue personnel at a distance not less than 20 m from the operator position. The monitors should be flat screen LCD active matrix of minimum size 6" measured diagonally.
- The system will be provided with a two-way audio system. Maximum Gain will be better than 90 dB. The camera will also house a speaker. The operators' headset will incorporate noise attenuating earphones and a boom microphone through which messages or instructions may be passed to the victim through the speaker housed in the camera piece.
- The system should not require more than two persons to operate, one operator to handle and control the probe and the second operator for the system functions, as well as viewing of the monitor. The probe operator will be provided ergonomic controls.
- The probe should not weigh more than 5 kgs.
- Two rechargeable dry batteries and a charger should be provided. The batteries should enable 3 hours continuous use and the charger should recharge these to 90% in less than two hours.
- The system should be capable of operation in a temperature range of -10^o to 50^o C.

Storage temperature - 0^o C to 36^o C
 Humidity - 10 % to 90%
 relative
 Water resistant- High water resistant

Capabilities Required (Breaching System).

- Power head weight- not more than 12 kgs.
- Boring speed- not less than 5 Cms per minute in standard construction grade concrete.
Breaching depth - 150 cm
- Bits- carbide tipped diamond stubbed bits (min.dia-52mm) capable of coring holes of minimum diameter of 55 mm (55mm).
- Cooling- pressurized water can, 2 gallon capacity with not less than 3 m hose with quick connect fittings.
- Field service kit- Canvas storage pouch, spare fuel tank cap, starter recoil assembly, allen key set for starter assembly, spare spark plug, spark plug wrench, copper washer, garden hose to water collar adaptor.

Scope of Supply

- Complete victim location system with camera mounted on rigid telescopic frame extendable to length > 9ft along with video display monitor, two-way audio system incorporating search microphone and communication speakers in camera housing and under-helmet headset with earphones and boom microphones, operator consoles all packed in an appropriate water tight, dust proof carry case.
- Separate remote hard-wired display monitor with extension cable to 20 m.
- Two batteries and charger.
- Complete Breaching System in appropriate carry case with two additional diamond and coring bits each.

NOTE

1. The confirmation that the stores are meeting the specification should be supported by adequate Documents/Literature etc.
2. These Documents of all stores offered be numbered and attached after all appendices and the numbering may be in continuation.

कय किये जाने वाले items के specification की जानकारी के लिए राज्य आपदा रिस्पॉस फोर्स से कार्यालय अवधि के दौरान सम्पर्क किया जा सकता है इसे आपदा प्रबंधन विभाग, बिहार की वेबसाइट www.disastermgmt.bih.nic.in तथा पी0आर0डी0 बिहार की वेबसाइट पर भी देखा जा सकता है।

TERMS AND CONDITIONS

7. The tender should be submitted in two parts (a) Technical bid and (2) Financial bid, duly sealed in two separate envelopes. If the two bids are submitted in the same envelope, then it shall be summarily rejected.
8. The rates shall be quoted only in the Financial bid. All charges like BST/CST/Service Tax/VAT etc. Shall be clearly mentioned but net rate (in figures and words) including all taxes etc. Shall be clearly mentioned.
